

Label Dispenser, (D)

Rugged external dispenser for labels. The dispenser is well adapted accessory to printers in the Intermecc EasyCoder range. Or can be adapted to any printer. The dispenser is designed for automatically applying the printed labels as they come out of the printer. Normally the product on the conveyer are generating the start of printing or you can have start by software in the printer. DF-4 unit is ideal for small and mid-size production lines where you want to use the printer to label the product "On Line", in a conveyer. This is an alternative to more expensive solutions where you do not need to label the product with the last label coming out from the printer. In many cases you are printing labels with the same information on every label, ex. bakery labeling bread.

- External dispenser for labels.
- Dispensing offers advantages for application automatically.
- Adapted for the **Intermecc EasyCoder**.
- Easy installation.
